FOR IMMEDIATE RELEASE

Solectria Renewables Releases New Monitoring Interface

SolrenView, Solectria's web-based monitoring application, has been upgraded with a new interface

Lawrence, MA – July 10, 2012 – [Solectria Renewables, LLC](#), the leading U.S. PV inverter manufacturer, introduced the redesigned interface of [SolrenView](#) at the [Intersolar North America trade show](#) today. SolrenView, Solectria Renewables' web-based monitoring application, has been restyled with a simple and intuitive interface to better serve our current and future web-based monitoring customers.

"Web-based monitoring has become a critical component of a solar system. Our application allows owners to clearly see the systems' status through analysis of inverter performance, weather patterns, and detailed AC output data. The new [SolrenView](#) still displays all of the analytics and details customers are accustomed to, but with a clean, concise, and intuitive approach. We've also added an *Environmental Offset* page to [SolrenView](#) which provides our customers with real-world examples of how much energy is being offset by their system," said James Worden, CEO of Solectria Renewables.

The new [SolrenView](#) is available for use with any residential, commercial or utility-scale solar installation. Options are available for: revenue grade monitoring and report generation, sub-array monitoring (SolZone), 3G wireless connectivity (SolrenView AIR), custom kiosk view, and a comprehensive weather station.

To learn more or view a live demo of SolrenView, please visit Solectria Renewables in booth 8211, exhibiting at Intersolar North America in San Francisco, California, July 10-12, 2012. You may also [CLICK HERE](#).

About Solectria Renewables, LLC

[Solectria Renewables, LLC](#) is the leading U.S.-based grid-tied photovoltaic inverter manufacturer. We offer residential, commercial and utility-scale inverters. Our versatile line of high efficiency products provide power solutions ranging from 1 kW residential systems to multi-megawatt solar farms. Solectria Renewables' products are backed by more than 20 years of experience in the power electronic and inverter industries and are supported by world class warranties. All of our commercial and utility-scale PV inverters are manufactured in the USA, ARRA compliant, Ontario FIT Content Compliant, and listed to UL 1741/IEEE 1547.
