

POWER LIMITING SERVICES

FOR INTERCONNECTION COMPLIANCE

Yaskawa Solectria Solar (YSS) now offers field-applied power limiting services for XGI 1500 inverters requiring specific kVA or kW limits to meet interconnection requirements.

YSS applies the kW and/or kVA limits securely, behind a controlled username and password, ensuring that settings are not customer accessible.

THIS SERVICE IS IDEAL FOR:

- Utility-mandated power limits
- Authority Having Jurisdiction (AHJ) requirements for documented power reduction
- Projects requiring verified, tamper-resistant settings

To support utilities and AHJs requiring visible confirmation of power limiting, YSS applies a durable, UV-resistant YSS label directly to the XGI 1500 inverter. This label clearly indicates:

- The Serial Number of the inverter
- That the inverter has been power limited
- The applied limit (kW/kVA)
- Verification that the limit was set by YSS

WHY CHOOSE THE YSS POWER LIMITING SERVICE?

- **Secure Configuration** — Limits are applied behind YSS credentials, preventing unauthorized changes.
- **Durable Field Labeling** — UV resistant labels provide clear indication of power limited status.
- **Flexible Service Options** — On site or remote support depending on project needs.

SOLECTRIA XGI 1500 INVERTER SERVICE

Available Services	
On Site Power Limiting Service	A technician performs the power limit on site for one day (~24 inverters). Includes verification, documentation, and application of the UV resistant label.
Add On Service (Start-up or Multi-Day Projects)	For projects that want to add Power Limiting Service onto the Start-up services or requiring more than one day of onsite work, this PN covers each additional inverter during start-up or beyond the first day.
Remote Power Limiting Service	Remote power limiting performed through YSS. REMOTE ACCESS PORTAL must be enabled on site for this option. Includes PDF verification and shipment of the UV resistant label.

HOW TO REQUEST SERVICE

To begin the process:

- ✓ **Request the required intake form:** contact appeng@solectria.com
- ✓ **Submit completed forms for quoting & processing:** email fieldservice@yaskawa.com
- ✓ **Questions?** Reach out to appeng@solectria.com for support.

DELIVERING CONFIDENCE IN EVERY POWER LIMITED INSTALLATION

Yaskawa Solectria Solar's power limiting service ensures your equipment is configured correctly, documented thoroughly, and labeled clearly — giving utilities, AHJs, and project owners complete confidence in compliance and performance.
